- Microservices | Distributed Systems | Frontend | Backend | Full-Stack | English, Russian, Uzbek – *All professional proficiency or above*

Experience

Uravo

Remote 10/2024– 07/2026

Full Stack Developer

- Used AWS, Python, TypeScript, Node.js and Nest.js to build event-driven integrations across CRM and messengers, so the business stopped paying staff to copy data by hand and records stayed correct in real time.
- Applied React, Redux, and JavaScript to build the candidate-facing UI of a recruiting platform handling thousands of records, so recruiters could manage applicants without the app slowing down or losing data.
- Wired PostgreSQL, REST APIs, and webhooks together to build two-way sync with datahub and stabilize a payment integration, so subscription billing stayed accurate across every connected system.
- Used Docker and CI/CD (GitHub Actions) to containerize services and automate deployments to cloud so new code shipped to production the same way every time without slow, error-prone manual steps.
- Leveraged Next.js to build fast-loading, highly polished marketing pages and optimise Google SEO rankings to drive higher lead generation.
- Used Agile (Scrum) to run sprint planning, standups, and code reviews while leading two junior engineers, so work shipped in predictable two-week cycles and blockers got caught early instead of at the deadline.

Stylemixthemes.com

Remote 04/2023 – 10/2024

Full Stack Developer

- Spearheaded the creation and implementation of the groundbreaking Open AI WordPress plugin "Ai Bud Wp." This versatile tool was engineered to deliver sophisticated fine-tuning capabilities, generate dynamic and engaging blog posts, and provide specialized chatbot functionalities tailored to niche markets.
- Played a pivotal role in the development of the Cost Calculator plugin, focusing on refining payment functionalities, implementing an intricate webhook mechanism, and devising complex financial management formulas.
- Led the implementation of advanced functionalities within the MasterStudy LMS plugin, including interactive quizzes, gamification elements, and real-time analytics, enhancing the platform's capabilities and boosting user engagement.

Wp-Webhooks.com

Remote 08/2022 – 04/2023

Full Stack Developer

- Created more than 25 WordPress plugin integrations like UltimateMember, WooCommerce, Yoast Seo, cache plugins and etc.
- Worked with a different type of the third-party applications like WhatsApp, Zoom, OpenAI through REST API and developed Integrations as an extension for the plugin functionality.
- Enriched UX/UI plugin functionality experience by using Vue.js, React.js, HTML, CSS5, Tailwind CSS
- Continuous Integration/Deployment Pipeline Integration, pull requests, code reviews, load/stress testing, unit/integration/e2e testing

Full Stack Developer

Zmarket.uz

Uzbekistan, Tashkent 10/2020 - 08/2022
